U. S. Department of Agriculture

Terms: Cash with order. No charge for packing. All prices include delivery by mail or express, except as noted.

As my bulbs and plants are beyond my control when they leave my hands, no guarantee goes with them, but I take extreme pains to have them healthy and true to name.

Missouri customers will please add two per cent to the amount of the order, on account of the state sales tax.

NARCISSUS BULBS

Mixture. Many varieties, all good, all beautiful, earliest to latest, for garden, naturalizing, cut flowers. All sizes, ungraded, as they dig. \$15.00 per bushel, \$8.00 per half-bushel, \$4.50 per quarter-bushel. Purchaser pays express.

Also, on the same terms, **Buttercup**, **Golden Sceptre**, **Croesus**, **Sir Watkin**, or any assortment of them, including **Mixture**, all items sacked separately, except in the gallon size. Per gallon, postpaid, \$2.75. Please specify which ones of the five items you wish included.

There is no telling how the bulbs will dig; but, judging from previous years, they will run more than sixteen hundred to the bushel, more than half the bulk being of blooming size. This gives the blooming bulbs at a low price, with the smaller bulbs thrown in. Get your neighbors to join you in a combined order.

Many people consider only the giant types of narcissi worthy of their attention. All sizes and kinds of narcissi have beauty and charm, and in these the small types are not surpassed. The flower that will most quickly and most often catch the eye in a planting is not the big trumpet, but the brilliant little dollycup. The bright-eyed and dainty kinds are well represented in this mixture.

The bulbs of this mixture have been grown in mixture for years, and can not be furnished by name, nor can the varieties be sorted out.

Buttercup and **Golden Sceptre** are jonquil hybrids, smallish, of richest deep yellow, **Golden Sceptre** with bell-shaped cup, **Buttercup** with straight cup, a few days later, both exquisite in odor.

Croesus is light yellow, with large disc, disc nearly flat, reddish orange. A brilliant flower.

Sir Watkin is large, light yellow, early, and has a large yellow cup.
